AYODELE  
TITILOPE

MEDICAL REPORT ON:

RE: AYODELE TITILOPE (AGE: 41 YRS. YRS./SEX: FEMALE/HOSP. NO. 0335)

The above named is a known patient of the facility currently being managed as an End Stage renal failure since 2012. Her condition progressively worsened overtime resulting in commencing heamodialysis in March, 2018. She has since been on twice weekly maintenance heamodialysis till date.

However, her management has been hampered by financial constraints.

As a result, she is being advised to have a renal transplant done as she would benefit immensely from it.

It is hoped that this will greatly improve her quality of life and outcome.

Subject to the above, she hereby requires a financial assistance to help in the progressive management of her condition.

Report is hereby written for record purposes.

Kindly be of assistance.

Thanks.

Dr. Olusoji .Z.O.  
Medical Officer
